

Janiece White LinkedIn Spotlight

Written by Liz Cotone

At Lakeshore, IT isn't just for when we forget our passwords. Our IT team is a valued part of the collaboration to create better processes and facilitate company growth. That's why we're so thrilled to have Technical Program Manager Janiece White on our side!

Janiece came to Lakeshore just over a year ago to help our IT teams transition to more Agile processes. She says, "There isn't really a typical day for me at Lakeshore, which is what I love about it." Janiece works in collaboration with our Development & Operations, Networking, Site Reliability, and ERP Integration teams to solve problems and manage smoother workflows.

"Everyone chips in when help is needed," Janiece says. "There's a willingness to roll up your sleeves and get your hands dirty, even at the highest levels. I've seen VPs on trouble-shooting calls—there's no ego or idea that anything is below your paygrade. That's the great thing about Lakeshore's culture."

When she was first hired, Janiece was invited to meet project owners from all the different departments she'd be working with. "I thought it was really cool that so many people I met had been here for over 20 years. Knowing there are so many people who've been here that long and are willing to stay here—that's definitely a sign of employee satisfaction."

When asked what she is most looking forward to at Lakeshore, Janiece says, "the opportunity to carve out my own role. I feel like my autonomy is really supported here, and our Leadership team always makes me feel empowered."

Janiece has already helped us grow so much, and we can't wait to see the shape her career takes as she continues to carve out her role here at Lakeshore. Want to contribute to the shape of your role, too? Explore careers at Lakeshore: [\[bitly\]](#).
